SUMMARY

Motivated and detail-oriented Software Engineering undergraduate with strong proficiency in Java, PHP, and JavaScript, and hands-on experience in full-stack development and API integration. Skilled in applying software architecture principles including MVC, Layered Architecture, and design patterns such as Factory and CRUD Utility to build scalable, maintainable applications. Experienced in developing end-to-end solutions using modern frameworks for both frontend and backend, with a strong focus on clean code, structured design, and effective problem-solving. Seeking an entry-level Software Engineer position to leverage technical expertise and contribute to innovative, real-world software solutions.

TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, TypeScript
- Databases: MySQL, PostgreSQL
- Frameworks: Spring Boot, Angular, Tailwind CSS, Bootstrap
- Tools: Git, GitHub, Docker, IntelliJ IDEA, VS Code, Android Studio, Postman, JIRA
- Methodologies: Agile/Scrum, REST API Development
- Security & Authentication: OAuth2, JWT, Spring Security

EDUCATION

Diploma in Software Engineering

Jun 2025 – Present

Institute of Computer Engineering Technology (iCET) Panadura, Sri Lanka

- Intensive, industry-simulated curriculum focused on full-stack development, modern workflows, and agile principles.

BSc (Hons) Computer Software Engineering (Reading)

Jun 2023 – Present

Birmingham City University Birmingham, United Kingdom

- Focus: Full Stack Development, Database Management, Robotics, AI, and IoT.
- Co-Lead developer for the Institution Management Software capstone project.

EXPERIENCE

CODEXA

Jan 2026- Apr 2026

RESTAURANT ERP SYSTEM

- Engineered a scalable Java and Spring Boot RESTful API using a layered architecture to manage real-time restaurant operations, order workflows, and kitchen processing. Implemented secure Role-Based Access Control (RBAC) and optimized MySQL schemas for concurrent transactions. Developed core modules for live inventory tracking, dynamic menu management, and automated financial reporting

PROJECTS

LAGATAMA-CRAFT

- Developed Lagatama-Craft, a dynamic web application built using PHP and MySQL to manage custom crafts, inventory, and user interactions. Implemented standard server-side scripting practices, secure database integrations for handling product data, and an intuitive user interface to streamline browsing and order management. Focused on clean code organization and efficient request handling to deliver a responsive, end-to-end e-commerce style web platform

CLOTHING MANAGEMENT SYSTEM

- Built using Java and Spring Boot with a RESTful API architecture
- Enables full CRUD operations for managing clothing inventory, products, and store data
- Designed with MVC architecture and layered structure for clean, maintainable code
- Integrated with a relational database for persistent data management

RESQ ALERT (MOBILE APP PROJECT)

- Designed and developed a cross-platform mobile application aimed at improving personal safety and emergency response efficiency. The app enables users to trigger instant distress signals, broadcasting real-time GPS locations to designated emergency contacts and authorities. Focused on building a highly responsive user interface and integrating robust location-tracking services to ensure dependability during critical situations.

CERTIFICATIONS

- Java Object-Oriented Programming
 - Agile Project Management with Jira Cloud: 1 Projects, Boards, and Issues
 - Agile Project Management with Jira Cloud: 2 Lean and Agile Processes
 - Agile Project Management with Jira Cloud: 3 Advanced Topics
-
